About the Conference

The Australian Copper Conference is one of the few corporate events dedicated solely to the copper environment. In the last three years the Conference has grown to be an essential corporate event for all major participants engaged in the copper industry. The Australian Copper Conference has built its reputation around the "core to consumer" perspective, catering for a variety of topics including exploration, developing, mining, financing, suppliers and investors.

The 2013 Australian Copper Conference brings together Australia's leading players in the copper mining sector with an audience of industry experts and bona-fide retail and institutional investors eager to discover who the big winners will be in this valuable market sector going forward.

Listen to experts outlining the latest market developments and the impact these outcomes can have on the copper industry. The conference networking function is also a great place to build relationships by engaging with senior decision makers and industry colleagues.
